

## **Laredo, Texas to Guadalajara, Jalisco (kilometers)**

Once again reset your odometer to 0.0.

- 0.0 Highway overpass. Here you will turn left and start heading south on HWY 85. This road is a little on the rough side, so take it easy.

- 507.0 Start of bypass around Matehuala - Matahuala is the mid-way point at around 6 hours. Good place to stay if you do not wish to make the drive in one shot, this town pretty much divides the trip in half. There are also 2 good motels to choose from (Casa Inn and La Palmao) and one is pet friendly. Also good food is to be had here. If you choose this option just be careful of the mileage as it will vary from simply going around, but it shouldn't be much.

- 710.4 Stay right to Lagos de Moreno and GDL  
For the next 4 km's there is going to be a huge Customs (Aduanas) Depot and the speed limit is only 60 km's per hour here, and the State Police love to hang around here and nab speeders during this really slow speed limit. So be watchful here for them.
- 739.7 **Toll 118 pesos**
- 786.5 Follow around  $\frac{3}{4}$ 's for HWY 80, but be careful here, there is a signage mistake. There are two ways to Lagos de Moreno  $\frac{3}{4}$ 's the way around, one turns to the right which is the free road which has the correct sign, and one goes straight onto the new excellent toll road. You want the straight through which is signed for Querétaro. Once on this Cuota road for a few kilometers you will see Lagos de Moreno and GDL signs.
